Key risks that are specific to the guarantor

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

The investor bears the risk of total or partial loss of the amount invested at redemption of the Certificates on the final exercise date or the event the Certificates is sold by the investor before that date.

Although it is subject to market making agreement, the liquidity of the product may be affected by exceptional circumstances that make it difficult to sell the product or at a price that results in a total or partial loss of the amount invested.

Certificates may be early redeemed automatically when the level of the Underlying(s) reaches a certain level. Investors will not benefit from the performance of the Underlying(s) subsequent to such event.

The market value of the Certificates depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Certificates and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), or early redemption of the Certificates and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

The investor is exposed to the risk that the proceeds from the liquidation of the collateral assets will not be sufficient to cover the amount due under the Certificates which is equal to their market value (without taking into account the default of the issuer or guarantor). Such shortfall may be due to lack of diversification or liquidity of the collateral assets, miscalibration, change or absence of haircuts applicable to the valuation of the collateral assets, correlation between the value of the collateral assets and the creditworthiness of the issuer or guarantor, collateralisation at par value or subordination to payment of certain providers.

The way the Index sponsor applies the index rules relating to the calculation, and modification of the composition of the Index and the integration of the events affecting its components may affect the value of the index and therefore the value of the Certificates.
Investors are exposed to the risk of operational capacity and expertise of the Index Sponsor to ensure the calculation and maintenance of the index according to the index rules in force throughout the life of the Certificates.

Investors are exposed to the risk relating to the operational capacity, expertise and solvency of the ETF management company, fund administrator, sponsor or Calculation Agent.
Since the ETF aims at tracking the performance of its underlying assets, investors are exposed to the performance of such assets.

Rischi chiave specifici del garante
Considerando che Société Générale è garante e controparte delle operazioni di copertura dell'Emittente, gli investitori sono essenzialmente esposti al rischio di credito di Société Générale e non hanno ricorso nei confronti dell'Emittente in caso di inadempimento dell'Emittente.

QUALI SONO I RISCHI CHIAVE SPECIFICI DEI TITOLI?

L'investitore assume il rischio di perdita totale o parziale dell'importo investito in occasione del rimborso dei Certificati alla relativa data di scadenza oppure nel caso in cui l'investitore venda i Certificati prima di tale data.

Benché sia oggetto di impegni di market making, la liquidità del prodotto può essere influenzata dal verificarsi di circostanze eccezionali che potrebbero rendere difficile vendere il prodotto o comunque ad un prezzo che produce la perdita totale o parziale dell'importo investito.

I Certificati possono essere rimborsate anticipatamente automaticamente quando il livello del(i) Sottostante(i) raggiungono un certo livello. Gli Investori non beneficeranno della performance del(i) Sottostante(i) successivamente a tal evento.

Il valore di mercato dei Certificati dipende dall'evoluzione dei parametri di mercato al momento dell'uscita (livello dei prezzi dei Sottostanti, tassi di interesse, volatilità e credit spreads) e può pertanto comportare un rischio di perdita totale o parziale dell'importo inizialmente investito.

Il verificarsi di eventi non legati al Sottostante (quali la modifica di previsioni di legge, inclusa la normativa fiscale, eventi di forza maggiore) possono determinare il rimborso anticipato dei Certificati e quindi la perdita totale o parziale dell'importo investito.

Il verificarsi di eventi relativi al Sottostante ovvero a operazioni di copertura può determinare la necessità di rettifiche, de-indicizzazioni, sostituzione del Sottostante, e di conseguenza a perdite del capitale investito, anche in caso di prodotti a capitale protetto.

Se la valuta di riferimento delle attività principali dell'investitore è diversa da quella del prodotto, l'investitore è esposto al rischio di cambio, in particolare in caso di controlli sul cambio, che potrebbero ridurre l'importo investito.

L'investore è esposto al rischi che i proventi derivanti dalla liquidazione dei titoli posti a garanzia non siano sufficienti a coprire l'importo dovuto ai sensi dei Certificati che sia pari al loro valore di mercato (senza tener conto dell'inadempienza dell'Emittente o del Garante). Tale shortfall potrebbe essere dovuto alla mancanza di diversificazione o liquidità dei titoli posti a garanzia, a un'errata calibrazione, a una modifica o all'assenza di haircuts applicabili alla valutazione delle garanzie, correlazione tra il valore delle garanzie e la solvibilità dell'emittente o garante,collateralizzazione al valore nominale o subordinazione al pagamento dei providers.

Le modalità con cui lo sponsor dell'Indice applica le regole di calcolo dell'Indice relativamente al calcolo, la modifica della composizione dell'Indice e il recepimento degli eventi che impattano sui suoi componenti possono avere un impatto sul valore dell'indice e quindi sul valore dei Certificati.

Gli investitori sono esposti al rischio legato alla capacità operativa e alla esperienza dello Sponsor dell'Indice ad assicurare il calcolo e il mantenimento dell'indice sulla base della metodologia di calcolo in vigore durante la vita dei Certificati.

Gli investitori sono esposti ai rischi legati alla capacità operativa, alla competenza e alla solvibilità della società di gestione dell'ETF, dell'amministratore del fondo, dello sponsor o dell'Agente di Calcolo. Dal momento che ETF mira a monitorare le prestazioni dei suoi asset sottostanti, gli investitori sono esposti alla performance di detti asset.
